SELNET ALERT 36

Dear SELNET member,

We would like to express our sincere thanks for your active participation in the **SELNET Annual Meeting**, which has been a valuable opportunity to strengthen collaboration and scientific exchange within our network.

We remind you that the **SELNET calendar of activities** is available and constantly updated. We encourage you to send us information about upcoming events that you organise in your institutions, in order to include them in the SELNET website and thus contribute to their dissemination among all members of the network.

We are pleased to announce that the **first results of the SELNET registry (SAR-TRACK study)** are ready to be submitted for publication. This initial analysis includes data from more than 1,500 selected sarcoma patients and provides a first insight into the reality of SELNET.

We also remind you that **SAR-TRACK is open for recruitment**. An amendment is currently underway (already submitted to previously activated centres). For those who have not yet activated the register in their institution, we encourage you to contact us so that we can support you in the activation process.

SAR-TRACK is one of the most powerful tools we have at SELNET, so we encourage you to actively participate.

Sincerely,
SELNET Executive Committee
