SELNET ALERT 42

Dear SELNET member,

Please book the dates for January 22 and 23

The MDT Sarcoma Committee of our university hospital, Fundación Jiménez Díaz, is organizing its annual educational event focused on sarcomas. This year, on January 22nd and 23rd, 2026, we will concentrate on local therapies in their various modalities, along with reflections on localized disease.

The event is primarily aimed at specialists involved in diagnosing or treating patients diagnosed with sarcoma, as well as residents from Latin America and the Madrid region.

The event will span two days. On the first day, there will be short presentations of 15-20 minutes each to encourage subsequent discussion, with a clear multidisciplinary approach. Represented specialties will include orthopedic surgery, oncological abdominal surgery, thoracic surgery, plastic

surgery, radiation oncology, radiology, pathology, nuclear medicine, and medical oncology.

On the second day, we plan to broadcast live from our operating rooms a retroperitoneal surgery and an isolated limb perfusion procedure via streaming.

We hope you will be able to reserve these dates according to your interest and availability and that you will widely share this event with your teams.

Due to budget restrictions (we have an agreement pending approval with PharmaMar Spain), we are unable to invite many of you to attend in person; however, if some of you have the opportunity to join us onsite, we will be pleased to assist with accommodation arrangements.

We are circulating the first draft of the meeting details.

Sincerely,
SELNET Executive Committee
