SELNET ALERT 48

Dear SELNET member,

The SAR-TRACK Registry is backed by a **solid track record**, **with over 5,000 cases collected** in the preliminary phase of the SELNET project. This foundation demonstrates the network's real potential when the centres are active.

However, **at the current stage, the level of registration is insufficient**. In 2025, only **70 new cases** have been added, a figure well below what is necessary to keep the registry alive, generate robust evidence, and ensure new publications, despite already having **one publication and another under review**.

There are currently centres with approved studies, centres that have approved the new version of the protocol, and newly incorporated centres, **but many have not yet activated registration**.

- **Centres that have registered cases in 2025:**
  - Hospital Clínico San Carlos (Spain)
  - Instituto Nacional del Cáncer de Uruguay (Uruguay)
  - Instituto Nacional del Cáncer de Paraguay (Paraguay)
  - Centre Léon Bérard (France)
  - Hospital Ciudad de la Salud (Panamá)
  - Instituto de Cancerología Las Américas Auna (Colombia)
- **New centres that have approved the observational study:**
  - Hospital Ciudad de la Salud (Panamá)
  - Hospital Pablo Tobón Uribe (Colombia)
  - Sociedad de Oncología y Hematología del Cesar SAS (Colombia)
  - Centro Médico ABC Observatorio (México)
- **Centres that have approved the amendment (new version of the protocol):**
  - Instituto Oncológico Fundación Arturo López Pérez (FALP) (Chile)
  - IDC – Instituto de Cancerología (Medellín) – Clínica Las Américas (Colombia)
  - Instituto Oncológico del Oriente Boliviano (Bolivia)
  - Hospital Universitario Fundación Jiménez Díaz (Spain)

Looking ahead to 2026, it is essential to reactivate registration in all centres. Without a significant increase in the number of cases, the study will lose scientific capacity, visibility, and publication opportunities.

If your centre has had its study approved and has not yet begun registration, it is a priority to get started now.

If you are a newly incorporated centre, we encourage you to begin the study approval process as soon as possible.

Thank you to all centres that have already registered cases, approved the study, or implemented the amendment! **Your commitment makes a difference.**

The SAR-TRACK Registry **only progresses if centres register cases**. Every active centre makes a difference.

Sincerely,
SELNET Executive Committee
